Fear Of Missing Out On Crypto? Join Diamond Pigs!

diamondpigs.com

DIAMOND PIGS

Would you like to enjoy the high returns from crypto but aren't sure how to begin or which coins to choose?

Are you already investing in crypto but missing opportunities because you don't have time to trade actively?

Are you looking to outsource your crypto investment activities to a trusted party without handing over control of your assets?

Whether you are a crypto novice or long time 'hodler', the smart Diamond Pigs portfolio management platform is the perfect solution for you.

Our Offering

The Diamond Pigs platform offers you a safe environment to easily select and execute the crypto investment strategy that best suits your goals and profile.

Our advanced technology enables you to delegate your crypto trading. Your wallet is actively managed while you maintain absolute control of your own assets.

Diamond Pigs offers you a range of investment strategies with typical risk-reward profiles to select from. The various strategies are managed by experienced crypto experts with a proven track record. To mitigate risks and optimize your returns, you may choose to execute multiple strategies simultaneously.

Our Investment Strategies

Our team composed four different crypto investment types representing a range of strategies with different risk-reward levels. The **Berkshire** investment is an index strategy that attempts to mimic the crypto market performance.

The **Duroc** as well as **Pennywell** investments are value strategies that focus on long-term projects. The **Jinhua** investment is a momentum strategy using a swing trading method to optimize return. Below, you can find more information on each strategy:

Investment Strategy Matrix

	 Berkshire	 Duroc	 Jinhua	 Pennywell
Focus	The largest coins in terms of market capitalization	New and innovative blockchain projects	Fastest movers in the entire cryptomarket	Environmentally friendly crypto assets
Number Of Coins In Portfolio	10	5 - 20	1 - 10	10-20
Trade Type	Automatic	Portfolio manager	Portfolio manager	Portfolio manager
Trade Frequency	Monthly	Weekly	Daily	Weekly
Risk - Reward Level	Low - Medium	Medium	High	Medium
Monthly Service Fee	0.25%	0.50%	0.50%	0.50%
Monthly Performance Fee	N/A	N/A	NA	N/A
Historical Performance	859.86% (Since 1-10-2019)	809.42% (Since 1-10-2019)	144.40% (Since 7-2-2021)	14.70% (Since 7-10-2021)

Past performance is no guarantee of future results

Berkshire

An index strategy consisting of the 10 largest and most liquid crypto assets based on market cap. Berkshire is passive and rebalanced periodically to reflect the latest market developments. The coins' weight ratios are optimized based on the last 2 years' market performance. Berkshire is comparable to an index fund or tracker of the stock market. Due to its diversified strategy of backing the winners, this strategy has a low risk profile with medium rewards opportunity.

Duroc

A broadly diversified portfolio consisting of at least 10 coins representing companies from all areas of the crypto ecosystem such as Defi solutions, 1st & 2nd layer platforms, oracles, and more. The coins selected represent companies that have a powerful strategic vision backed by a strong management team, aiming to provide real solutions for real problems. Duroc is actively managed and backed by in-depth research. The Duroc strategy is comparable to that of a private equity firm focussing on scale-ups. The portfolio has a moderate risk-reward opportunity level.

Jinhua

This portfolio is actively managed and based on technical analysis and community networking. It focuses on trading opportunities to capture short-term gains offered by highly volatile rising star coins. The market sentiment is carefully monitored as it may change rapidly. The Jinhua strategy is comparable to that of hedge funds. The portfolio has a high-risk reward opportunity level.

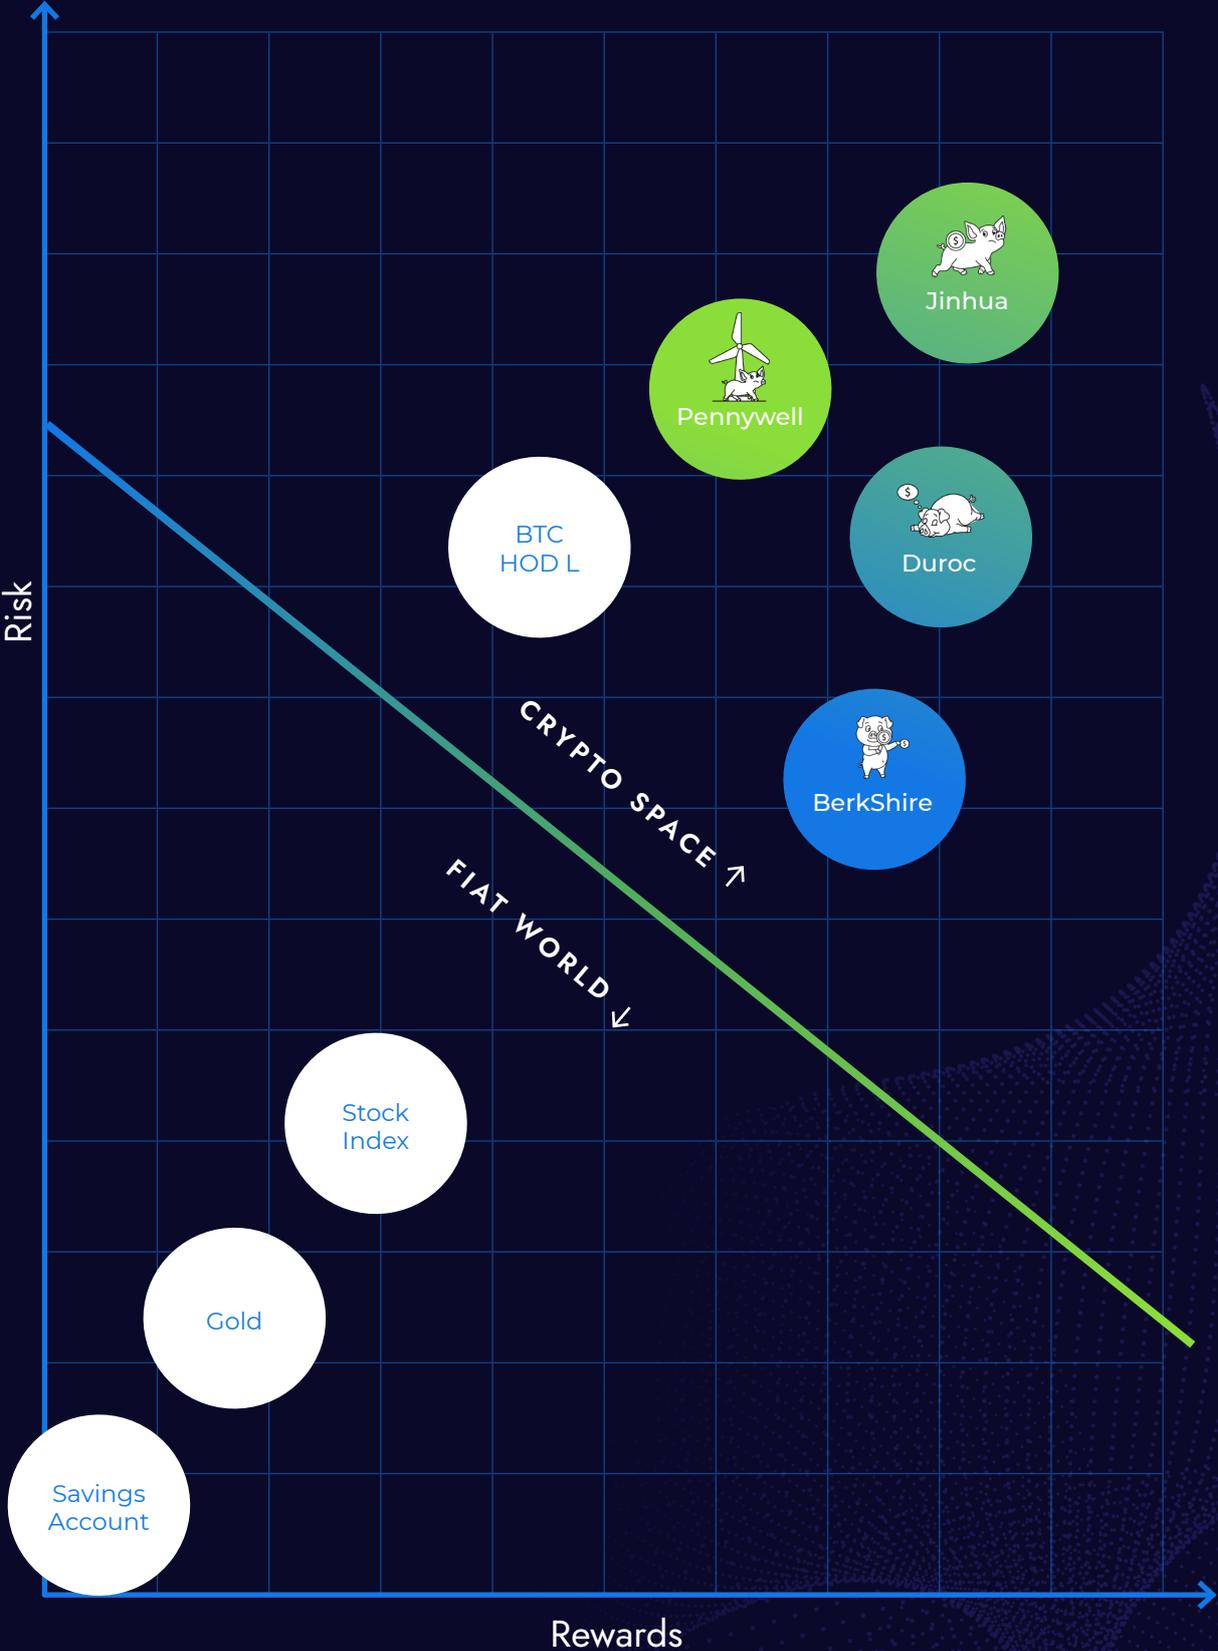

Pennywell

We believe it is possible and necessary to create a green economy made up of businesses operating in the blockchain space that pursue profit while also benefiting the environment. With Pennywell, we invest in crypto coins that give a chance to change the world while also making good returns. The strategy has a moderate risk-reward opportunity level.

DIAMOND PIGS

Risk — Reward Chart:

For Comparison Purposes Only

Your Main Benefits

- **Peace of Mind**

Ask us Anything

? Are you a fund or a platform?

We offer a platform where various investment strategies can be selected and executed automatically within your wallet. We are working with dedicated and experienced investment strategy managers.

? Are you a trader or investor?

We are neither a trader nor investor. We offer a platform that connects to exchanges and helps you to execute investment strategies within your wallet.

? How do you determine each investments' strategy risk level?

For each investment strategy, a risk level is determined based on historical performance.

? Can I invest in fiat currencies such as EURO or Dollar?

We are only working with crypto currencies on our platform.

? Is there a minimum amount required to join Diamond Pigs?

There is a minimum crypto currency amount equivalent to \$5000 required to join Diamond Pigs.

? How can I get my money out?

You can decide at any time to terminate your subscription on the Diamond Pigs platform, automatically followed by the disconnection between your Diamond Pig account and your Binance wallet.

? How do I join Diamond Pigs?

1. Open a Diamond Pigs account
2. Open an account on Binance exchange
3. Connect your Binance account with the Diamond Pigs account
4. Confirm the investment amount and select your desired strategies

Customer Evidence

As a long-time BTC hodler, in early 2018, I joined the cryptopig investment club, which became one of the first altcoin-focussed funds around in 2018. The team has demonstrated solid knowledge in the crypto space and its ability to see the bigger macroeconomics picture. Combined with their sound and secure ICT knowledge and ability to adapt to today's standards, I am confident of the teams' success and a happy customer!

Michiel

As a fintech expert, I want to participate in the 'on-chain' future of finance. But, as a crypto novice, I don't have the time, nor the insights to trade myself. I also don't want to lock up my funds in a volatile market. So, getting the option to manage my crypto from my own wallet as well as the flexibility to diversify by choosing a few strategies at the same time, gives me the confidence to work with the Diamond Pigs team.

Conny

As a retired entrepreneur and seasoned investor, I am aware of the speculative nature of crypto investments. The DiamondPigs team has clearly demonstrated their skills to outperform Bitcoin.

Rob

About US

Originates from the Cryptopigs, a club of friends that in 2018 jointly started to invest in upcoming and promising crypto projects. Their efforts gradually evolved into the Diamond Pigs platform.

The Diamond Pigs refer to the famous quote by the great Winston Churchill who once said “Dogs look up to us. Cats look down on us. Pigs treat us as equals.” Likewise, it’s our goal to make investing in the crypto space an equal opportunity regardless of one’s knowledge of the technology and the sector. Paraphrasing Napoleon - the ruling pig in George Orwell’s famous

novel ‘Animal Farm’ - we like to say that all pigs are equal but that the diamond pigs for sure are more equal than others. That is why we named each one of our investment strategies to a famous pig breed.

Our founders’ team is made of leading experts in the crypto and blockchain space. We are technology-driven entrepreneurs with decades of working experience. We have dedicated ourselves to help you get the best out of the opportunities the crypto space has to offer.
